The International Conference on Smart Systems for Integrated Computing and Communication (ICSICC) is a prestigious event that brings together researchers, academicians, professionals, and industry experts from around the world to discuss and exchange ideas on the latest advancements in smart systems, integrated computing, and communication technologies. ICSICC provides a platform for researchers and practitioners to present their research findings, share insights, and collaborate on innovative solutions to real-world challenges. The conference typically features keynote speeches, technical paper presentations, poster sessions, workshops, and panel discussions, allowing participants to engage in meaningful discussions and networking opportunities. By fostering interdisciplinary collaboration and knowledge exchange, ICSICC contributes to the advancement of smart systems and integrated computing technologies, addressing societal needs and driving innovation in various domains. Overall, ICSICC serves as a premier forum for researchers and professionals to stay updated on the latest developments in smart systems and integrated computing, paving the way for a smarter and more connected future.

Selected papers are set to be published by Springer in LNICST, Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering Series by Springer (indexed in El-Compendex, Scopus, DBLP, SCImago, Google Scholar, etc)
